

OPENING SOON | 10/09 IN CENTRAL LONDON

LOW SECURE HOSPITAL FOR MEN

 Battersea Bridge House is a new, purpose built, independent low secure hospital.

 It will provide assessment, multi-disciplinary care, on-going treatment and focused rehabilitation for up to 22 male patients aged between 18 and 65 years old.

 The Hospital benefits from a central London location with 22 en-suite bedrooms and landscaped gardens.

Care Pathway Model

Following a comprehensive multi-disciplinary assessment we will work with individuals to develop individualised treatment plans focussed upon risk reduction & maximised opportunity.

We will provide programmes of treatment and support which focuses on each individuals potential progressing them towards a return to living in the community or stepping down to our open rehabilitation units, Southleigh & Woodleigh which are situated in Croydon.
